

SUPPLIER BIOSECURITY

Prevent the movement of disease from farm to farm.

Site Access

- Avoid unnecessary entry into barns or farms.
- Discuss all biosecurity protocols with farmer.
- Clean vehicles prior to arriving on farm.
- Fill out provided visitor log sheets.

Equipment

- Clean all equipment before entry.
- Use dedicated equipment for the barn when possible.
- Clean equipment before moving it to another barn.

Entry and Biosecurity

- Allow 48-hour gap between farm visits when possible.
- Stay out of barns when sick, particularly with flu-like symptoms.
- Wait 7 days after international travel before entering a barn.
- Don't bring pork products into barns due to risk of disease transmission.

Clothing and Footwear

- Wear clean clothing and footwear not used at other barns.
- Use disposable boot covers upon vehicle exit.
